

**CRANWORKS**

# THE PREMIERE U.S. GOVERNMENT VENDOR FOR EVERYTHING CRANE

Craneworks, Inc. specializes in engineering, inspections, repairs, upgrades, and new crane procurement for secure, government research and repair facilities. We are experts in the application of the NAVFAC P-307 and NAVCRANECEN INST 11450.2A. Founded in 1999, Craneworks quickly developed a positive track record working with government facilities and we have since grown to become the largest private provider for Navy crane services. Annually, Craneworks inspects 1,000 cranes and delivers 15 new hoists/cranes. Many customers choose to work with Craneworks because they require 1) highly qualified/certified crane technicians, 2) assistance with purchasing fully compliant equipment, or 3) assistance managing a high-compliance crane program.

## CLIENTS
